

Online Safety Policy

Introduction

This policy will outline the expectations of all staff and contractors who work with vulnerable people and their responsibilities with the monitoring of online safety.

Contractors play a crucial role in ensuring that the vulnerable people they come into contact with understand the need to use the internet/mobile devices in an appropriate way.

Statement of Intent

Axcis Education is committed to safeguarding and promoting the welfare of vulnerable people and expects all staff and all contractors on its register to share this commitment.

This online safety policy will be reviewed annually, or more regularly in the light of significant developments in the use of technologies, new threats to online safety or incidents that have taken place.

Procedures

Staff and contractors are responsible for ensuring that:

- They have an up to date awareness of online safety matters and of the current school/unit online safety policy and practices.
- They report any suspected misuse or problem to their Line Manager/Headteacher/Child Protection Officer for investigation/action/sanction.
- All digital communications with vulnerable people/parents/friends of students or family members/carers/clients/outside agencies should be on a professional level and only carried out using official school/company systems
- Students/pupils will have access to the school's/unit's digital technology systems and are encouraged to be responsible for following a Safety Policy for the use of online technology.
- In lessons where internet use is pre-planned students/pupils should be guided to sites checked as suitable for their use and that processes are in place for dealing with any unsuitable material that is found in internet searches.
- Staff should act as good role models in their use of digital technologies, the internet and mobile devices.
